Spectral characteristics

Insect trap adhesive tape

Adhesive resin tape with sustainable adhesive force

Holds the dead insect on the adhesive tape to maintain environment clean.

The special adhesive resin sheet that can sustain adhesive force more than one year from the start of use has the highest level of capture force in the industry.

Even if only a leg of an insect touches the sheet, it can capture the insect, as the sheet has a thick adhesive layer. As the sheet does not release even small insects, it can capture many insects.

Lure flying insects efficiently by 365nm wavelength of light. High insect luring efficiency.

Many kinds of models are available.

You can select a model from rich lineup to suit any place.

Installation example; Restaurant

MPX-2000 : Standard model
*8 more models

MPX-2300 : Standard model
*4 more models

Easy replacement of insect catching tapes and a lamp.

HACCP safety standard

You are able to use these machine as a part of the implementation of HACCP.

The glue tape is very efficient compared to electric insect catcher because it doesn't scatter the dead insects and is possible to check the number and types of insect to measure the pest control.
